DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1- 14,17-19, drawn to a manual resuscitator, classified in class 73, subclass 716.
 - II. Claims 15 and 16, drawn to a manual resuscitator, classified in class 73, subclass 716.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are distinct in that group I does not contain the gauge, bearing, chamber and shaft structure in group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by

Art Unit: 2855

their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Groups I and II is not required for Group III, restriction for examination purposes as indicated is proper.

A telephone call was made to Dean M. Turman, Reg. No. 50,322, on 3-4-05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
